## Awards and projects

- 
- Effective women award of the year 2019
  - Free medical days placed on school and charity associations
  - Diabetes clinic in queen rania hospital supported with new technologies and patients caring unit
  - Employee of the month

\*Diabetes and diabetic foot care

It was my project and idea to give more care on diabetic patients and change their lifestyle to be more healthy . by medical education and good medication counselling... follow up and monitoring for blood glucose ..and medications dosage adjustment according to the pt response. Our patients are educating about diabetes complication and advices to check their eye vision and follow retinopathy if present in the clinic ..diabetic foot care and dressing in the clinic done by well trained nurse and good available dressing material. This clinic project was refund by petra region authority

\*creative of vitamin initiative Which is voluntary work care in patient awareness and education

\*so many of voluntary work and projects in order to increase the civil awareness and acknowledgment on so many habits and medical caring
